MeVisLab

Development Environment for Rapid Prototyping &
Product Development in Medical and Industrial Imaging

MeVis Medical Solutions AG
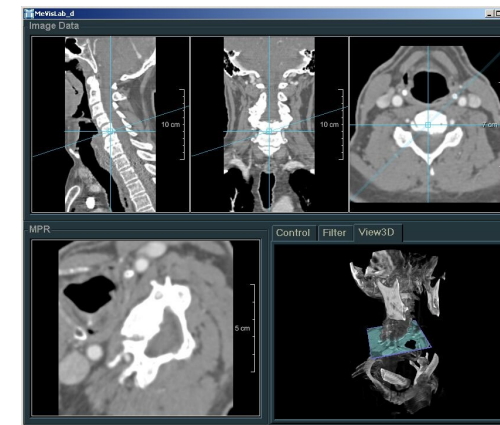

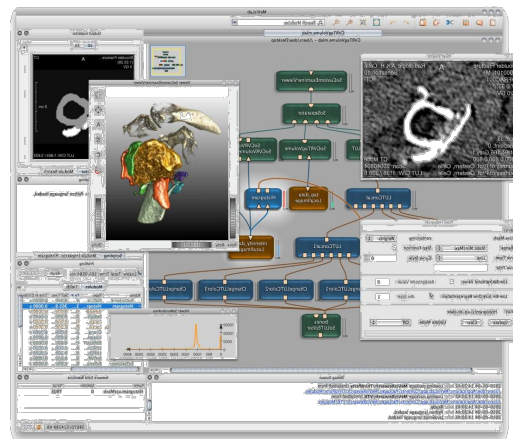

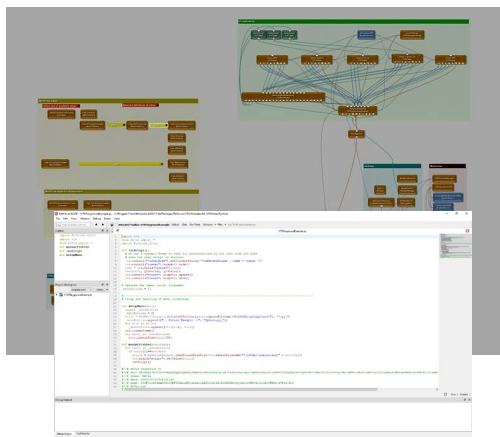

Development Environment

For **rapid prototyping & product development** in **medical and industrial imaging** (Windows, Linux, macOS)

www.mevislab.de

MeVis

From Prototype to Product

Prototyping

- Use > 3.000 pre-defined image processing modules
- Create hierarchical image processing pipelines and visualization networks
- Write your own modules (Python or C++)
- Integrate AI frameworks via Python

Evaluation & Testing

- Integrated debbugging and profiling functionalities
- Powerful auto-test framework

Product Development

- Object-oriented GUI design and scripting
- Connect networks to your own user interface
- Generate installable executables for distribution
